OVERVIEW

Entrepreneur High School, (eHigh) is a wall-to-wall entrepreneur school located in the start-up-rich Inland Empire just east of Los Angeles. eHigh students are given the opportunity to choose career training in a number of high demand industries while following a college prep curriculum. Students research the academic and professional areas that best suit their personalities and interests, while determining how to apply those skills to meet the market trends and demands of the Inland Empire and beyond. eHigh's standards-based curriculum prepares students to earn a high school diploma while pursuing a career pathway of their choice. Students will graduate fully prepared to enter college, start a business, or enter the workforce.

PATHWAYS

- Design, Visual, and Media Arts
- Professional Sales and Entrepreneurship/Self-Employment
- Food Service and Hospitality
- Software and Systems Development

Through every eHigh course and activity, our unique Entrepreneur Skills are infused to ensure our students are college and career ready. Our model prepares students for success by focusing on the skills that are in short supply in both higher education and industry.

Analyzing Text & Data

The ability to analyze text and data to extract information and build understanding.

Pitching

The act of persuasively presenting an idea.

Storytelling

The art of describing ideas, processes, and information in a narrative form.

Experimenting

The process of testing and evaluating progress, and changing based on results.

Prototyping

The act of creating an initial version of a product or service to gather data and feedback.

Thinking Visually

The ability to use visual and graphic representations to motivate and demonstrate thinking.

Ideating

The ability to generate ideas to innovate and solve problems.

Providing Feedback

The process of evaluating products and processes and providing constructive information as a basis for improvement.

Working in Teams

The act of working collaboratively with others toward a collective outcome.

Interviewing

The act of gathering information, thoughts, and opinions through questioning and listening to others.

Reflecting

The process of thinking deeply about past action and performance.

Writing

The ability to organize ideas, data and information in written form.

GRADE 9

This year introduces 9th grade students to the 12 entrepreneurial skills - the foundation of an eHigh education. Students learn basic research skills by completing a SWOT analysis of the local community and wider region. Students complete skills/interest surveys to determine their topics of interest and the types of activities/professions that best match their personalities. Ultimately, students take a survey course in which they learn about all of the pathways the school has to offer: 1) **Design, Visual, and Media Arts**, 2) **Professional Sales and Entrepreneurship/Self-Employment**, 3) **Food Service and Hospitality**, and 4) **Software and Systems Development**. Students also take a course in Financial Literacy.

GRADE 10

Students begin their introductory pathway courses based on the choice they made during their 9th grade year. Students are also assigned to mentors from partner businesses or organizations. In addition, students are eligible to take introductory career and technical education college courses through our dual enrollment partnership with San Bernardino Valley College (SBVC).

GRADE 11

Students begin internships with one of eHigh's internal businesses that are connected to the pathways (Currently Panther Prints and Panther Eats). Students take intermediate level pathways career courses, as well as have the opportunity to take any college courses they are interested in through SBVC. All pathways career courses have an end of the year culminating project that is showcased to the school community.

GRADE 12

Students continue to work in internships and have the opportunity to take any college courses that interest them through our higher education partner. Students take advanced level pathways career courses. All students present an end of the year portfolio as part of their senior project. Interested students can also incubate a new idea into a business start-up, demonstrating the unique skills infused through their 4-year high school experience.

ALL STUDENTS AND GRADE LEVELS

- Numerous guest speakers from every career field tied to our pathways
- Mock interviews
- Job skills training and workshops
- Field trips to local and regional businesses and community organizations
- College trips
